				Zip Code	28168
Lender or Client		Movement Mortgage			

SCOPE OF APPRAISAL

I have no current or prospective interest in the subject property or the parties involved; and no services were performed by the appraiser within the 3 year period immediately preceding acceptance of this assignment, as an appraiser or in any capacity.

I certify, as the appraiser, that I have completed all aspects of this valuation, including reconciling my opinion of value, free of influence from client, clients representatives, borrower, or any other party to the transaction.

The intended user of this appraisal report is the Lender/Client. The intended use is to evaluate the property that is the subject of the appraisal for a mortgage finance transaction, subject to the stated scope of work, purpose of the appraisal, reporting requirements of this appraisal report form, and definition of market value. No additional intended users are identified by the appraiser.

NEIGHBORHOOD DESCRIPTION

The subjects market area is built up of a wide range of housing which is typical in outlying sections of the county. There are older homes, newer housing as well as mixed but smaller developments and many custom homes as well as many land owners containing acreage. These typically make up the bulk of higher value properties. The location is close to schools, shopping and other amenities.

Not every property can be the presominate value range. There are sales excessively higher than the subject as well as considerably lower and the subject does fall within the upper and lower values. The subject is not adversely affected by the value range and is a very marketable property as the closed sales data indicates many other sales alsofall within the same range in the defined market.

SUBJECT is located in a development of custom homes, values fall closer into alignment overall. Mid range of the market.

Vacant land use consists of approx 36% total for the entire market.

MARKET CONDITIONS

Some data indicating as more current 12-24 months values to be increased overall for ALL property types.

Some variables per period of 60-90 day ranges.

MORE current data does reveal some stability.

Lower inventory continues to impact the market reactions.

MOST agents are stating fewer offers per property. This has been the result in the past to affect higher values with MOST propertie selling over list with MULTIPLE offers.

1-30 days common and most are under 10 DOM

In smaller communities the data can be limited and specifically more current time and or short periods. So more clear and accurate analysis often takes time, 180 days to develop more specific changes.

Current market overall still shows SOME UNBALANCE OF supply AS MORE demand currently exist with MORE buyers than sellers in many cases.

Low Supply and more demand along with lower rates have assisted in more buyers.

THE MARKET REMAINS VERY ACTIVE AND FEWER LISTINGS ALONG WITH A CONTINUED AMPLE # OF BUYERS AND IN SOME CASES MORE BUYERS THAN SELLERS THE MARKET IS EXPERIENCING OFFERS OVER LIST AND IN SOME CASES AS HIGH AS 10% OR MORE. MULTIPLE OFFERS ARE COMMON TO EXIST IN MOST PROPERTIES.

SHORTER MARKETING TIMES ARE A RESULT OF FEWER LISTINGS AND MANY PROPERTIES

ADDITIONAL COMMENTS

Lender or Client	Movement Mortgage						

ARE GOING UNDER CONTRACT SAME DAY OR VERY SHORT TIME PERIODS.

Interest rates have increased in more recent times. This SO FAR at present has not had a major impact current market conditions, it may in the future. As the inventory remains very low and few properties available this continues to makes it a sellers market that continues thus impacting values in a positive manner.

HIGHEST AND BEST USE

The four tests used in the analysis of highest and best use of a property are (1) legally possible, (2) physically possible, (3) financially feasible and (4) maximum profitability.

The subject's site is typical in size, shape and topography for residential dwellings. Therefore, the highest and best use, both vacant and as improved, is Residential.

PROPERTY CONDITION

This appraisal for measuring, calculating, and reporting of gross living area and non-gross living areas conforms with American National Standards InstituteANSI Z765-2021 .

List above is as close as data resulted in a comparative manner.

Vale community over a 10 mile radius.

TWO factors; #1 there were limited sales in the same development. As custom home subdivisions and rural setting with smaller # of homes, fewer sales result in any one area.

Fewer even stiil are Log Home sells.

I expanded outward 25 mile radius to locate Log home comps. Few results, most were considerable distances and all out of county.

ADDITIONAL COMMENTS				
Page 3				
Borrower or Owner William Jernigan				
Property Address 6440 Keeneland Trail				
City	Vale	County	Catawba	State NC Zip Code 28168
Lender or Client Movement Mortgage				

Comp 1 is best comp in same development. It is the ONLY sale in Heatherbrook current.

The next closest location was SW Hickory in the Mtn View community, comps 2-4- are from this subdivision, shares same middle and high schools.

Coimp 3 is a non log, wood sided home on small acreage in rural NON development setting of Vale.

Comp 5 is a log home sell, one of the most similar in line item characteristics.

SITES; these are all SF lots and or small acreage rural parcels. There is NO standard price per acre or per lot. Each site has its own characteristics.

Site size is a factor BUT it is NOT the sole value indicator.

Many aspects result to impact land values. ALL comps were analyzed, compared and or adjusted accordingly.

#1 is similar, single lot. Slightly larger size but subject has better topo and views. NO value resulted in any measureable differences.

#2 has superior lot size, similar topo and view type. Development lot parcel, slight superior for size.

#3 is non development rural acreage site. Superior for size and overall was the main measurable difference.

#4 is like #2, single lot in Deerfield. Similar value lot.

#5 is non development lot, private acreage parcel. It is closer to major hwys, towns and cities, that was a factor considered. It is also in mixed use area, lower value homes and commercial. NONE seemed to be a major measurable impact in any manner.

Comp 1 is a brick home, similar quality, high grade construction to match. 3 higher value differences consist of the smaller GLA, it is supported by other sales, then the garage and high grade custom pool. The line item adjustment for the pool is over 10%\$ but again the only sale in same development. Higher gross and net resulted due to pool and garage.

Comp 2 used to support GLA, most line item differences were smaller values. The garage being most significant as was the case with both 1 and 2.

Comp 3 is lesser exterior quality of materials. Overall craftsmanship is a comparative range. Smaller GLA and no finish also two variables. Mainly included as a sale current in same Vale area. Higher gross and net due to 4 line item differences.

Comp 4 is included for purposes of site value, brackets GLA, basement garage. Lower line items and low net and gross.

Comp 5 used as Log home. 4-5 higher value differences but still one of the most simliar sales of log construction.

RECONCILIATION

I did place some more significant weight on comp 1 overall. Comps included each weighted however and

ADDITIONAL COMMENTS

		Zip Code	28168	
Lender or Client		Movement Mortgage		

support closely in some manner.

Current conditions of the market lend to a weighted factor more than anything else. Enough comps were closer in location so that alone was not a major issue to concern.

Typical variances resulted as properties like these and subject often differ somewhat. Therefore each factor was a weighted consideration.

COST is included but in this type older housing it is not common or practical to be weighted or support. It is used as cross reference option. The subject could be income producing property, however SF homes are not common to be sold based on income potential. NOR is there adequate data to develop the income approach.

ADDITIONAL COMMENTS

ONE MAJOR ASPECT THE READER/USER OF THE REPORT MUST UNDERSTAND THAT IN MANY CASES THE APPRAISER WORKS THRU DATA IN 'GENERALITIES' NOT SPECIFICS.

NOT EVERY VARIABLE IN A LINE ITEM CHARACTERISTICS DOES NOT MERIT A VALUE ADJUSTMENT.

ALL DATA IS PLACED IN THE SALES/MARKETING GRID AND COMPARED BASED ON THE APPRAISERS PERSONAL KNOWLEDGE AND EXPERIENCE.

DISTANCE; Hwys and travel routes are NOT specific to be value dividers. Rather more emphasis is placed on specific comparative data that falls as close into alignment with the subject. SPECIFIC characteristics can be more comparative from a sale/listing in another area farther distance. IN this market, most cases consist of TRUE comparables over 1 mile range and emphasis is therefore placed on the MOST similar data overall. Some market characteristics exist that the reader MUST take into consideration.

Vale being a rural area, covering two counties expansion is always necessary.

Sale Dates: The most similar comps were included. In many situations an older sale may be MORE comparative and closer than a current sale so those are included. The 12 month history reveals a stable enviroment and no or very llimited measureable means to develop any significant changes. The MOST current comparables were included from those researched.

All sites are SF lots/small acreage in SF residential areas. Some cases differences can exist in specific factors like topo, use/appeal of the site, access such as public or private, location in or outside a development, views, etc.

All things considered, some variables in these issues may exist but limited data was available to make adjustments solely based on factors like Square footage/lot size ONLY. Rather each comparables site was analyzed based on ABOVE reasons specific to the comp and subject, then assessment was made and adjusted or compared accordingly.

Small acreage can develop value differences BUT again more so based on total characteristics well above area alone. Each comp was analyzed specific and value assessment made from available options, paired sales where data exist, extraction, land sales, etc. All compared and or adjusted accordingly.

Style/design are part of Quality assessment and comparisons.

Quality; As stated prior ALOT of factors go into the process of Quality assessment.

For example one aspect consist of materials, another exsit in craftsmanship.

Quality varies from home to home even in certain situations of new and older homes. Example a new home where custom has ALOT of variables to consider. In a spec home, the buyer can have options for customization. In an older home, over time changes can be made, such as condition renovations in an older home typically use more current and modern standards for materials and then also in many cases craftsmanship upgrades.

Actual Age/Effective Age; Age/Condition: These are combined to one line item as in most cases age alone is difficult to assess a specific value impact within a reasonable range of age.

In generalities a range exist in ages, common from 5-10 yr encrements. In a home for example 20yrs or so the components are in a stage of end of economic life, IN a newer home 1-20yrs a 5 yr encrement may be more

ADDITIONAL COMMENTS				
Page 5

		Zip Code	28168	
Lender or Client		Movement Mortgage		
common range of comparison. In an older home 25 plus yrs ALOT more emphasis has to be placed on ACTUAL conditions or Effective age. Again keeping in mind the appraisers data options more limited to what the agent/MLS data reveals and what information is made available in generalities. IN data options like MLS as the MAIN source, agents rarely offer specific time frame of component replacement unless it is a situation where current renovations exist and even then the data is often limited to generalities like "MAJOR renovations" or "CURRENT remodeling" without specifics. In some cases an agent may list date of a roof or HVAC replacement. PAGE #1 UAD/defintion of the subbject is specific to time frames of new, 1-5yrs, 6-10yrs, etc. That same specifics is MOST often not available to the appraiser for comparables. Each comp is analyzed and where the data supports thru analysis such as paired sales, extraction or market reaction. NOT all ratings are the same such as C3-C4 allow for variances and UAD also allows for an adjustment in cases where the market data reflects and supports an adjustment. Again the appraiser is more limited in UAD ratings to C2-3-4 as most common range. ROOM COUNT: This is more so analyzed as the specific property type. A certain home for example may be common in the market at 2-3-4 BR, ALL rooms as total are again reflective of the specific style/design/quality and size. BATHS are more common to be the single room measureable from a market standpoint that can be adjusted. ONCE again more emphasis is placed on the MOST specific property comparison. BATH: I only located one sale in 10 mile radius that was 3 full baths above grade. It is not comparative. Sold \$600,000 on 18 acres of land, no basement, indoor pool, large detached bldg/fencing, too many variables to be deemed a comp. GLA: THIS can be another major area of variance in market data. Even in the same immediate market area such as same street as many differences as 100-1000sf range can and do exist. MLS data does not match the same UAD 1004 reporting. MLS/agents market homes for ALL levels as total GLA, that means if a home has above grade and below grade heated living space, that total is used to sell the home. HOWEVER, in the 1004 grid the appraiser cannot compare the same. Therefore the appraiser in many cases is limited in search for GLA range. The emphasis is placed on 1st locations, 2nd analyze that data available and included or extract any comparables MOST similar in Above Grade and Below Grade, GLA support. GLA can vary in specific home types. EMPHASIS is placed first on the most similar property, example those CLOSEST, CURRENT as possible, similar Quality and Style/design, then emphasis on Actual Conditions and then those that compare as closely as possible in GLA. GLA; Typically the MLS/agent data is used in GLA comparisons placed in the grid. Public data, specifically in older homes is less reliable. However, NOT all agents measure at time of listing and in many cases agents rely on public records and report same exact GLA as tax cards, etc. Again the appraiser is using the data made available and comparisons are made based on those generalities. In cases where the public records show a larger variance in GLA from say the reportin comps or the subject this is often a result of the common practice of local county records showing TOTAL GLA such as ALL levels, above and below grade in the total line item. It is most often seperated in a different section of the tax card to reveal which level is calculated specific in GLA for each living space. ANOTHER factor to consider in GLA is the aspect of a specific property can vary price per SF in comparison based on total property characteristics. NOT all are the same value per SF for ALL properties, in some cases even one comp can vary from another in comparison to the subject price per SF. Also considered is the fact that a "RANGE" has to be considered in comparison. A typical accepted range by most clients/lenders is 100sf BUT that is NOT the only range that exist. IN many cases the larger the home the broader the range or vice versa. A smaller home, say under 900sf a broader range may exist, a larger home may vary by as much as 10% size difference and still fall closely in alignment to market reaction. Basements: IN cases where a basement exist, typically emphasis is placed on inclusion of basement homes. The total space is analyzed, compared and or adjusted price per SF from a market reaction. Price per SF for basements is commonly LOWER than above garde, specifically where unfinish exist. Then in a case where any finish space exist, this is compared based on TOTAL finished area provided by sources. Finished space is very limited in public records, MLS/agent is often the best source for this square				

ADDITIONAL COMMENTS				
Page 6				
Borrower or Owner William Jernigan				
Property Address 6440 Keeneland Trail				
City	Vale	County	Catawba	State NC
			Zip Code	28168
Lender or Client Movement Mortgage				
footage. However, in many cases agents do not always adequately report basements correctly. Example, one agent may define the finish space based on the fact whether it is heated space, another may define based on the materials of finish. Options like photos where available is one source for clarification of these issues, however they are not always made available to the appraiser. Other factors in basement finish consist of the age/condition of the home. An older home with finish may consist of materials at the era of construction. While another may have been completed at a more current time period, then there are newer homes and materials to consider. ONCE again I state, the appraiser is operating in generalities. Typically NO rooms in basements can be adjusted. Again from the sources available, not all MLS data clearly and accurately report rooms, specifically in the case of BR's since the legal status requires egress/ingress. Agents do not always report these accurately and in many cases Basement BR's do not have proper egress. In cases where other rooms vary, the MLS data from a search standpoint does NOT allow the appriaser to search specifically on rooms. ONLY total Sf is adjusted on basements for Unfinish and then for Finish. Car storage options; These can be impacted by alot of factors that include the # of vehicles access, the utility for access such as attached or detached, then builtins, etc. Also considered are Quality which the UAD does not give the appraiser an option for variance. UAD reporting only allows for the # of vehicles. Quality/utility access and use are other options analyzed in car storage comparisons. In cases where carports exist these can vary for Quality and use/utility from attached to detached being the 2 major variables that are taken into account. Builtins are valued on the basement line item most commonly due to the location is in the basement, any utility such as the accessibility may be considered on the car storage line. Porches/Decks/patios. These too vary much like car storage for Size of the components, the quality and appeal along with the use and utility options. These are more common to be very broad ranging. ONE main reason is the limited available data from sources. MLS/public records do not always provide accurate size and or defintions of quality. Every effort is made to compare as close as possible based on the options made available to the appraiser in assessment. Other detached amenities that exist are common from small out buildings for storage, these are very common place in this market and consist of various size outbldgs and typically these are personal property due to the fact that they can be moved/moveable amenities. They are used to house item like lawn equipment, store items, hobby use or workshop, etc. Others included options like pools, detached garages, fences, etc. These ALL too vary alot based on common characteristics of quality, size, condition and how that amenity applies to the marketability to the property as a whole. Observation, ALL comps were observed from external view as close as possible. All comp photos are real time with exception to comp 3. This is a private setting with secluded acreage on private street access. NO real time clear view could be made. MLS photo included for #3 Comp 5 is similar situtaiton. Private lot, no clear access to view in a manner to gain an accurate photo so MLS included. ALL photos in the appraisal report were taken by the appraiser date of this report except the MLS photos. Not every line item of variance can be fully supported by market data for a line item adjustment. So in most cases it is required by the appraiser to assess ALL data and conclude to a specific value based on ALL market conditions and make the best assessment of that data for a value conclusion. COMMENTS ON COST APPROACH The Age-Life Method is used to derive depreciation for the subject improvements.				

Uniform Residential Appraisal Report

3866523
File # PLC74888

ADDITIONAL COMMENTS

Each sale included was done so as the appraisers personal knowledge, experience, and expertise of the market and chosen for specific purposes of comparability. Paired sales data analysis, market extraction methods and typical understanding of market reaction were sources for value development among the comparables included.

Exposure Time is defined as:1-90 days

1. The time a property remains on the market.
2. The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based on an analysis of past events assuming a competitive and open market. Exposure time is always presumed to occur prior to the effective date of the appraisal. The overall concept of reasonable exposure encompasses not only adequate, sufficient, and reasonable time, but also adequate, sufficient, and reasonable effort. Exposure time is different for various types of real estate and value ranges and under various market condition. (Appraisal Standards Board of the Appraisal Foundation, Statement on Appraisal Standards No. 6 "Reasonable Exposure Time in Real Property and Personal Property Market Value Opinions")

Market value estimates imply that an adequate marketing effort and reasonable time for exposure occurred prior to the effective date of the appraisal. In the case of disposition value, the time frame allowed for marketing the property rights is somewhat limited, but the marketing effort is orderly and adequate. With liquidation value, the time frame for marketing the property rights is so severely limited that an adequate marketing program cannot be implemented. (The Report of the Appraisal Institute Special Task Force on Value Definitions qualifies exposure time in terms of the three above-mentioned values.)

Concessions: These are somewhat typical for existance although approx half of comps have them and then there are other issues like financing or cash buyers. This data is very difficult to detect from the market IF any impact on value exist due to these variables. Concessions are not only varying in # of comps that have them but also to vary in the amounts. For that reason as well as the fact that it is difficult to establish if full dollar for dollar impacts the sale price. Since there is no full support no adjustments are common to be made or found necessary as even if adjusted fully most cases reveal it would not impact the final value outcome. *** See Additional Comments ***

COST APPROACH

COST APPROACH TO VALUE (not required by Fannie Mae)									
Provide adequate information for the lender/client to replicate the below cost figures and calculations.									
Support for the opinion of site value (summary of comparable land sales or other methods for estimating site value)									
Estimated from market extraction and sales data of vacant land sales.									
ESTIMATED ☒ REPRODUCTION OR ☐ REPLACEMENT COST NEW					OPINION OF SITE VALUE.....=\$ 30,000				
Source of cost data Local Cost Data					Dwelling 2,304 Sq. Ft. @\$ 180.00 =\$ 414,720				
Quality rating from cost service Good Effective date of cost data 10/12/2022					BSMT 1,440 Sq. Ft. @\$ 30.00 =\$ 43,200				
Comments on Cost Approach (gross living area calculations, depreciation, etc.)					Porch/Deck/Appli/FP 32,000				
Some depreciation is observed based more so on age and reflected in Effective Age consideration. No functional or external obsolescence is observed.					Garage/Carport Sq. Ft. @\$ =\$ 0				
					Total Estimate of Cost-New =\$ 489,920				
					Less Physical Functional External				
					Depreciation 73,488 =\$ (73,488)				
					Depreciated Cost of Improvements.....=\$ 416,432				
					'As-is' Value of Site Improvements.....=\$ 28,768				
Estimated Remaining Economic Life (HUD and VA only) 85 Years					Indicated Value By Cost Approach.....=\$ 475,200				

INCOME

INCOME APPROACH TO VALUE (not required by Fannie Mae)									
Estimated Monthly Market Rent \$ 0 X Gross Rent Multiplier 0 = \$ 0 Indicated Value by Income Approach									
Summary of Income Approach (including support for market rent and GRM) SF homes are not common to be valued based on income and a lack of data for this approach is also a reason for not including.									

PUD INFORMATION

PROJECT INFORMATION FOR PUDs (if applicable)									
Is the developer/builder in control of the Homeowners' Association (HOA)? ☐ Yes ☐ No Unit type(s) ☐ Detached ☐ Attached									
Provide the following information for PUDs ONLY if the developer/builder is in control of the HOA and the subject property is an attached dwelling unit.									
Legal name of project									
Total number of phases			Total number of units			Total number of units sold			
Total number of units rented			Total number of units for sale			Data Source(s)			
Was the project created by the conversion of existing building(s) into a PUD? ☐ Yes ☐ No If Yes, date of conversion									
Does the project contain any multi-dwelling units? ☐ Yes ☐ No Data Source(s)									
Are the units, common elements, and recreation facilities complete? ☐ Yes ☐ No If No, describe the status of completion.									
Are the common elements leased to or by the Homeowners' Association? ☐ Yes ☐ No If Yes, describe the rental terms and options.									
Describe common elements and recreational facilities									

Market Conditions Addendum to the Appraisal Report

MARKET RESEARCH & ANALYSIS

The purpose of this addendum is to provide the lender/client with a clear and accurate understanding of the market trends and conditions prevalent in the subject neighborhood. This is a required addendum for all appraisal reports with an effective date on or after April 1, 2009.

Property Address 6440 Keeneland Trail City Vale State NC ZIP Code 28168

Borrower William Jernigan

Instructions: The appraiser must use the information required on this form as the basis for his/her conclusions, and must provide support for those conclusions, regarding housing trends and overall market conditions as reported in the Neighborhood section of the appraisal report form. The appraiser must fill in all the information to the extent it is available and reliable and must provide analysis as indicated below. If any required data is unavailable or is considered unreliable, the appraiser must provide an explanation. It is recognized that not all data sources will be able to provide data for the shaded areas below; if it is available, however, the appraiser must include the data in the analysis. If data sources provide the required information as an average instead of the median, the appraiser should report the available figure and identify it as an average. Sales and listings must be properties that compete with the subject property, determined by applying the criteria that would be used by a prospective buyer of the subject property. The appraiser must explain any anomalies in the data, such as seasonal markets, new construction, foreclosures, etc.

Inventory Analysis	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)	4	1	2	☐ Increasing	☒ Stable	☐ Declining
Absorption Rate (Total Sales/Months)	0.67	0.33	0.67	☐ Increasing	☒ Stable	☐ Declining
Total # of Comparable Active Listings	2	1	2	☐ Declining	☒ Stable	☐ Increasing
Months of Housing Supply (Total Listings/Ab.Rate)	3.00	3.00	3.00	☐ Declining	☒ Stable	☐ Increasing
Median Sale & List Price, DOM, Sale/List %	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Median Comparable Sale Price	440,500	430,000	469,500	☐ Increasing	☒ Stable	☐ Declining
Median Comparable Sales Days on Market	4	3	5	☐ Declining	☒ Stable	☐ Increasing
Median Comparable List Price	399,900	429,500	444,000	☒ Increasing	☐ Stable	☐ Declining
Median Comparable Listings Days on Market	10	18	6	☐ Declining	☒ Stable	☐ Increasing
Median Sale Price as % of List Price	101.00	101.00	101.00	☐ Increasing	☒ Stable	☐ Declining
Seller-(developer, builder, etc.) paid financial assistance prevalent?			☐ Yes ☒ No	☐ Declining	☒ Stable	☐ Increasing
Explain in detail the seller concessions trends for the past 12 months (e.g., seller contributions increased from 3% to 5%, increasing use of buydowns, closing costs, condo fees, options, etc.). Typical closing concessions have been stable in the market and range from \$1500-5000. There are no trends to indicate these to be increasing or any unusual concessions to influence values.						
Are foreclosure sales (REO sales) a factor in the market? ☐ Yes ☒ No If yes, explain (including the trends in listings and sales of foreclosed properties).						
Cite data sources for above information. Carolina MLS						
Summarize the above information as support for your conclusions in the Neighborhood section of the appraisal report form. If you used any additional information, such as an analysis of pending sales and/or expired and withdrawn listings, to formulate your conclusions, provide both an explanation and support for your conclusions.						
DATA is more specific to the subject HOWEVER in this market there is a VERY BROAD range of property characteristics and can differ from period to period based more so on these factors. Overall the market has shown signs of some increases in values, shorter market times, etc. ONE or two sales may result in varied line items above HOWEVER one or two low sale prices or longer market times in limited # of sales can result in a manner NOT fully observable to the reader.						

If the subject is a unit in a condominium or cooperative project, complete the following:

Subject Project Data	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)				☐ Increasing	☐ Stable	☐ Declining
Absorption Rate (Total Sales/Months)				☐ Increasing	☐ Stable	☐ Declining
Total # of Active Comparable Listings				☐ Declining	☐ Stable	☐ Increasing
Months of Unit Supply (Total Listings/Ab. Rate)				☐ Declining	☐ Stable	☐ Increasing
Are foreclosure sales (REO sales) a factor in the project? ☐ Yes ☐ No If yes, indicate the number of REO listings and explain the trends in listings and sales of foreclosed properties.						
Summarize the above trends and address the impact on the subject unit and project.

APPRAISAL AND REPORT IDENTIFICATION

This Appraisal Report is one of the following types:

- ☒ **Appraisal Report** This report was prepared in accordance with the requirements of the Appraisal Report option of USPAP Standards Rule 2-2(a).
- ☐ **Restricted Appraisal Report** This report was prepared in accordance with the requirements of the Restricted Appraisal Report option of USPAP Standards Rule 2-2(b). The intended user of this report is limited to the identified client. This is a Restricted Appraisal Report and the rationale for how the appraiser arrived at the opinions and conclusions set forth in the report may not be understood properly without the additional information in the appraiser's workfile.

ADDITIONAL CERTIFICATIONS

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The report analyses, opinions, and conclusions are limited only by the reported assumptions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no (or the specified) present or prospective interest in the property that is the subject of this report and no (or specified) personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- This appraisal report was prepared in accordance with the requirements of Title XI of FIRREA and any implementing regulations.

PRIOR SERVICES

- ☒ I have **NOT** performed services, as an appraiser or in any other capacity, regarding the property that is the subject of the report within the three-year period immediately preceding acceptance of this assignment.
- ☐ I **HAVE** performed services, as an appraiser or in another capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment. Those services are described in the comments below.

PROPERTY INSPECTION

- ☐ I have **NOT** made a personal inspection of the property that is the subject of this report.
- ☒ I **HAVE** made a personal inspection of the property that is the subject of this report.

APPRAISAL ASSISTANCE

Unless otherwise noted, no one provided significant real property appraisal assistance to the person signing this certification. If anyone did provide significant assistance, they are hereby identified along with a summary of the extent of the assistance provided in the report.

ADDITIONAL COMMENTS

Additional USPAP related issues requiring disclosure and/or any state mandated requirements:

MARKETING TIME AND EXPOSURE TIME FOR THE SUBJECT PROPERTY

- ☒ A reasonable marketing time for the subject property is 1-90 day(s) utilizing market conditions pertinent to the appraisal assignment.
- ☒ A reasonable exposure time for the subject property is 1-90 day(s).

Requirements - Condition and Quality Ratings Usage

Appraisers must utilize the following standardized conditions and quality ratings within the appraisal report.

Condition Ratings and Definitions

C1 - The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

**Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).*

C2 - The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

**Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.*

C3 - The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

**Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.*

C4 - The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

**Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property*

C5 - The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

**Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.*

C6 - The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

**Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.*

Quality Ratings and Definitions

Q1 - Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified use. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are exceptionally high quality.

Q2 - Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residences constructed from individual plans or from highly modified or upgraded plans. The design features detailed high-quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q3 - Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4 - Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5 - Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6 - Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard non-conforming additions to the original structure.

Definitions of Not Updated, Updated, and Remodeled

Not Updated - Little or no updating or modernization. This description includes, but is not limited to, new homes. Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated - The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost. An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled - Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion. A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls and/or the addition of square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example: 3.2 indicates three full baths and two half baths.

Uniform Residential Appraisal Report

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER’S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
11. I have knowledge and experience in appraising this type of property in this market area.
12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER’S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser’s analysis, opinions, statements, conclusions, and the appraiser’s certification.
2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser’s analysis, opinions, statements, conclusions, and the appraiser’s certification.
3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
